APX radio accessories

Resilience without compromise

Table of contents

Mission critical performance focused on durability and flexibility to keep you safer

Motorola P25 APX radios deliver what first responders need to increase their safety and improve their situational awareness. Get the most out of your APX radio by extending its power and reliability with resilient APX accessories. They are the only accessories tested and certified for use with APX radios. Our accessories endure rigorous testing to last longer and help keep you safer. There's simply no substitute for Motorola APX accessories.

Motorola's exclusive energy and audio features are made for mission critical moments

IMPRES™ 2 Energy: Your radio is your lifeline. If your battery dies, it jeopardizes everything.

That's why we introduced the IMPRES 2 for APX series radios. It's a next-generation energy system that's safer and smarter, while keeping you powered for even longer. With IMPRES 2 chargers, you can charge batteries up to 40% faster. Customize your charging to extend the life of batteries in storage. And manage power more intelligently with enhanced diagnostics, so you get the most from each battery.

IMPRES Audio: I hear you, even when you can't hear yourself.

Motorola's exclusive IMPRES audio accessories help suppress ambient noise, amplify loudness and improve voice intelligibility. IMPRES audio can virtually block out all background noise in any extreme environment with windporting and noise-cancelling technology. Ensure your voice is heard loud and clear no matter what direction you speak with an advanced microphone system. IMPRES audio will make sure you are heard in any demanding environment.

	IMPRES 2 Li-Ion 3200 mAh Battery, IP68 Rugged*	Battery	PMNN4816	
	IMPRES 2 Li-Ion 4400 mAh Battery, IP68 Rugged*	Battery	PMNN4817	
	IMPRES 2 Li-Ion 3650 mAh Battery, IP68 Rugged*	Battery	PMNN4818	
	IMPRES 2 Single-Unit Fast Charger, US/NA 115V	Charger (SUC)	PMPN4604	
	IMPRES 2 Multi-Unit Fast Charger with 6 Displays and 6 Integrated USB Charging Ports, US/NA, 100-240V	Charger (MUC)	PMPN4591	
	Whip Antenna, 762-870 mHz, 15cm, Ferrule	Antenna	AN000411A01	
	Stubby Antenna, 762-870 mHz, 10cm, Ferrule	Antenna	AN000418A01	

* APX N70, N70 XE, N50, N30 & APX NEXT XN batteries come with self-calibration feature when used with IMPRES 2 Single-Unit Fast Charger (SW ver V2.05 and above) and IMPRES 2 Multi-Unit Fast Charger (SW ver V2.05 and above).

XVN500 Remote speaker microphone

Audio for extreme environments

The XVN500 features four high dynamic range (HDR) microphones, which are arranged for all-round coverage. This guarantees that communications are clear from every direction. The designated HDR mic arrangement also provides significant muffled audio reductions from any positions that the RSM may be held or worn.

To further enhance noise suppression, all HDR microphones are not only windported but are also placed behind our exclusively engineered housing. This further redirects airflow and facilitates water draining, effectively mitigating any leftover wind noise. The adaptive noise suppression also allows for voice tracking while filtering out surrounding background noise, giving you the best clarity in your communications.

The XVN500's HDR microphone technology prevents speech distortion, even when shouting in extreme noise environments. And as the noise environment changes, so will the XVN500 to adjust for maximum noise cancellation. When combined with the APX NEXT XN, this technology will give firefighters high quality audio features for any intense situation.

Loud and intelligible

The XVN500 RSM speaker improves speaker clarity while the maintaining best in class volumes. Even at the highest volume, the RSM will maintain understandable and intelligible audio output. This audio cuts through the noisiest environments while simultaneously preserving audio richness at mid to low volumes.

The XVN500 audio experience is enhanced by using the full features of the adaptive audio engine on the APX NEXT XN. This dynamically optimizes the radio's performance in the presence of background noise. Adaptive microphones gain control while adaptive speaker equalization provides the loudest, most intelligible audio in any environment, even at maximum volume.

The algorithm in the XVN500 RSM allows additional audio features like Receive Volume Leveling to be maximized through the RSM. With receive volume leveling, a firefighter can set the volume once, and the radio will adjust based on the power of the received audio of loud or soft voices.

SVX Video remote speaker microphone

Voice and video, combined without compromise

By converging our industry-leading APX NEXT and N70 radio line and our trusted body camera technology, we've transformed what it means to be on the front line. Now, your team can get the best of both worlds, by accessing mission-critical communications, evidential video capture and public safety-grade AI from one device, without sacrificing ergonomics or usability.

But we didn't stop there. We know that, even though technology should be a force multiplier for modern law enforcement agencies, it often just serves to create more stress - whether it's an issue of equipment management, training or budget. The SVX solution goes beyond just converging hardware: it also revolutionizes the workflows around device deployment, usage and even evidence handling: so now, your team can get twice the results from half the resources.

APX, amplified and more intelligent

Clear audio is a crucial element of effective law enforcement, from talking to your team throughout a high-stakes situation, to capturing confessions and witness statements on the go. Like the rest of our RSM portfolio, the SVX is designed with audio quality top of mind: two high dynamic range (HDR) microphones, sophisticated windporting and intelligent noise reduction technology ensure that officers will be heard, even in the most demanding conditions.

This clear audio means that ViQi will hear you better than ever before, and it's also the gateway to a better response downstream: leveraging the SVX's voice technology, our Assist AI can generate more reliable incident creation prompts for dispatchers, and provide more accurate license plate searches for intelligence analysts.

APX Next XN battery

What is self-calibration?

Selected IMPRES 2 batteries are equipped with the self calibration feature and can be identified through this logo on the battery label. These batteries do not require long hours of calibration or reconditioning process, when charged with:

• IMPRES 2 Single Unit Fast Charger (SW ver V2.05* and above)
• IMPRES 2 Multi Unit Fast Charger (SW ver V2.05* and above)

IMPRES 2 multi-unit charger

Charge up to six APX NEXT XN, APX NEXT XE, APX NEXT, APX N70, APX N50 and APX N30 radios or batteries simultaneously for more efficiency.

- IMPRES 2 charging algorithms increase charge cycles up to 60% over non-IMPRES
- Provides up to 3A per pocket for faster charging
- Disable calibration mode or enable long term storage mode
- Optional wall mount kit NLN7967
- California Energy Commission (CEC) energy efficiency compliant

Antennas

Designed for wearability

Details

Motorola Solutions' redesigned antennas provide convenience without compromising performance. Shorter and more flexible, these antennas conform to the users' mission critical environments.

- The 7/800 MHz and UHF Stubby Antennas deliver great coverage but will not snag on clothing or equipment.

- The Whip, Single and All-band Antennas are fabricated using a new polymer that delivers 40% better flexibility.

Antenna ID bands

Colored antenna ID bands are available for easy customization and come in packs of 10.

- ○ 32012144001 Gray
- ○ 32012144002 Yellow
- ○ 32012144003 Green
- ○ 32012144004 Blue
- ○ 32012144005 Purple

Will APX NEXT antennas (stubby single-band and flexible all-band) work with other APX family radios such as the APX 8000 and APX 6000?

No. The current APX antennas have an embedded GPS antenna. The APX NEXT antennas do not have an internal GPS element because the hardware is located inside the radio itself. This means that APX NEXT antennas cannot be used with other models of APX radios.

Stubby   Single band   All-band

Hear and be heard like never before

The XVE500 is the next generation mission-critical RSM designed for optimal use with APX NEXT™ XE radio. Equipped with four high dynamic range microphones, automatic audio leveling, noise reduction and a built in ViQi button, the XVE500 RSM delivers the clear, loud audio communications. Which allow easy access to radio controls and critical information. Whether you are in the heat of a fire or exposed to extreme weather conditions, the XVE500 will keep you connected to your team. This RSM was designed to withstand heat exposure of 500˚F (260˚C) for up to 5 minutes.

Key features

- Heat resistant housing and cable
- Loudest, clearest speaker
- Four High Dynamic Range (HDR) microphones
- Dedicated ViQi button
- Water and Wind Shielding
- New adaptive noise suppression
- Illuminated emergency button

*RSM Firmware:
1. Ensure the radio firmware is updated to the latest version
2. Radio will update the RSM firmware automatically once the RSM is connected to the radio.

Enhanced controls

The XVE500 RSM is an evolution of the XE500 RSM platform and like its predecessor was designed with the user's extreme environment in mind. From the exaggerated knobs and controls, that are easy to operate with bulky gloves to the asymmetrical shape that makes it easier to find the controls without looking.

Adaptive audio engine

XVE500 RSM utilizes 4 integrated microphones and an Adaptive Audio Engine. Similar to the radio, it automatically changes the level of noise suppression, microphone gain, Windporting and speaker equalization to produce clear and loud audio in any environment.

Flexible wearing

The strategic placement of the microphones and enhanced water drainage provide users with the flexibility to wear it straight, upside down and even sideways while still delivering loud and clear audio.

Extreme performance

Whether you are in the heat of a fire or exposed to extreme weather conditions the XVE500 will keep you connected to your team. This RSM was designed to withstand heat exposure of 500˚F (260˚C) for up to 5 minutes. Built as a system, the APX NEXT XE and APX 8000XE with the XVE500 have been tested to meet IP68 (2 meter, 4 hours) submersibility specifications.

Easy access to ViQi

ViQi is your virtual assistant, designed for public safety. the three-dot dedicated viqi button on your xvp rsm allows you to operate ViQi from your shoulder.

It's ViQi's job to quickly provide the information you need to stay safe and effective. Checking a driver's license? Just ask her. Need to run a plate? She's on it. She'll even discreetly warn you to move out of earshot if she has important information to share.

She understands natural language voice commands, from changing zone, channel and volume, to getting status checks. All while keeping your hands free and your focus on your surroundings.

Click here to learn more about ViQi.

How do mission critical wireless accessories help me?

They free you from being physically connected to the radio and are ideal for surveillance operations. They look consumer, but are mission critical in performance and provide exceptional flexibility, high security, superior audio performance and a new dimension of freedom. Carry your radio in a backpack, bag or purse without being constrained by wires.

WM800 Wireless Remote Speaker Microphone

The WM800 RSM enables loud and intelligible communications in the noisiest environments, allowing seamless transmissions from any direction.

The mission critical WM800 Wireless Remote Speaker Microphone delivers ultra clear audio communications in a compact, wireless design. Built as a unified system with APX NEXT, N-line and Standard APX radios, the WM800 RSM redefines communication ensuring your voice is heard in every direction even in the most challenging environments. Clarity, reliability and durability converge to empower your mission's success. Every feature on this RSM has been purposefully designed with all of the advanced capabilities of Mission Critical Wireless device including four high dynamic range microphones, adaptive noise suppression and enhanced security.

Additional features include 3 programmable buttons, an emergency button, a volume control, audio jack and task light that allows you to read items such as a driver's license in the dark. This RSM features all of the advanced capabilities of Mission Critical Wireless including enhanced security, fast push-to-talk and quick touch pairing with voice prompts that confirm pairing actions. This RSM also features a removable and rechargeable battery.

How does Commport™ work?

The miniature microphone and receiver connect to your APX radio and fasten securely and comfortably to your ear. Unlike bone conduction or boom mic technology, the CommPort System picks up sound waves as they cross the face so you hear and can be heard virtually in any environment.

What are the EP7 Sonic defenders ultra earplugs?

RLN6511, RLN6512, RLN6513 The EP7 Sonic Defenders Ultra Earplugs provide extra comfort and/or noise protection for users wearing surveillance accessories or users wearing heavy duty headsets / helmets. With a foam-tipped stem design and soft memory-foam Comply™ Canal Tips, these comfortable earplugs protect your hearing without blocking your ability to hear routine sounds or conversations. Safe sounds are allowed to pass through into the ear canal, while potentially harmful noises (above 85dB) are reduced through a filter.

Filter caps are included and can be inserted for additional hearing protection or removed for use with surveillance kits.* With a patented EarLock® technology to hold them in place, all-day comfort, and a low-profile design, these earplugs can be worn while wearing a helmet or mask, or while using a phone or heavy duty headset. Lanyard is included in each earplug kit.

Motorola's Tactical Solution offers a high performance interface enhanced by high speed DSP (Digital Signal Processor) which only detects the human voice.

Providing steady and trouble free transmission without clipping your message even in the noisiest environments.

Combined with various headsets assures efficient and safer operation in a variety of work environments.

IMPRES 2 – A new generation. completely re-energized.

With IMPRES 2 chargers, you can charge IMPRES 2 batteries up to 40% faster. Customize your charging to extend the life of batteries in storage. And manage power more intelligently with enhanced diagnostics, so you get the most from each battery. IMPRES 2 batteries have been improved inside and out, so your team can tackle whatever the day brings. With higher capacity, you'll get more talk time. With better water resistance, you'll never think twice about submersion. And with the ability to charge up to 60% more times than standard Lithium Ion batteries, you'll reduce costs.
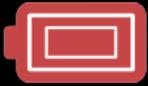

Increased capacity

Do more without the bulk.
First responders, public works employees, and other professionals know that shifts aren't getting any shorter. Thankfully, you can keep your people connected even longer. IMPRES 2 batteries deliver higher capacity without an increase in size.

Durable design

Tackle the toughest conditions.
Wherever the job takes you, be confident your battery will be up to the challenge. All IMPRES 2 batteries share the same IP68 rating as APX radios, which means they can be fully submersed in two meters of water for up to four hours. Designed with a rugged housing, they're as tough as the radios they charge. And in test after test, IMPRES 2 batteries continually withstand shocks, knocks, drops and shakes, outperforming the competition every time.

Extended battery life

Extended life. Built to last.
You face challenges every day. Battery life shouldn't be one of them. IMPRES 2 batteries, when combined with an IMPRES 2 charger, deliver up to 60% more charging cycles than traditional Lithium Ion batteries, so they're on the job longer. Which means you can stock fewer spares, and replace fewer batteries. We've also extended our capacity warranty from 18 to 24 months*, while backing all IMPRES batteries with a long 48 month workmanship warranty. IMPRES 2 batteries are compatible with all existing IMPRES chargers, so your upgrade will be a smooth one.

*IMPRES 2 batteries not charged exclusively in IMPRES 2 chargers receive a 6 month capacity warranty reduction to 18 months instead of 24 months.

Battery fleet management

Battery Fleet Management mitigates efforts behind the complexity and costs related to battery and charger management, making it easier for you and your employees to work safely and efficiently. Ensure optimal fleet performance with an updated user interface, meant to ease management and analytics capabilities.

Scan QR code to view the IMPRES Battery Fleet Management brochure.

When the IMPRES Battery Fleet Management software collects critical data, it allows you to analyze key aspects of the battery, such as battery age, capacity, recondition history and manufacturing and service dates. This information is then compiled into an accessible, user-friendly layout, so you are able to efficiently understand your devices' data. No other manufacturer delivers this patented technology and comprehensive capabilities.

For details on the 3 BFM on-premise configurations and how to order the Entitlement ID, view the Ordering and Deployment Guide. The IMPRES Battery Fleet Management Software is available to download from Motorola Solutions' internal MyView portal.

Carry solutions

Motorola Carry Solutions were developed to meet the demands of public safety and other users who operate in the most rigorous of environments. A variety of carrying accessories are available for comfort and convenience.

Long range wireless remote speaker microphone (RSM)

The Long Range Wireless Remote Speaker Microphone (RSM) pairs instantly with touch pairing to the mobile microphone with Bluetooth gateway. The Long Range Wireless RSM works up to 100 meters away line-of-sight from the mobile radio, keeping you in communication where you never thought possible. Plug and play – Just attach the mobile gateway microphone to your radio, align the two devices where indicated by the blue dot and you are ready to go. Voice prompts will walk you through pairing quickly.

APX mobile radio accessories

COMPATIBILITY	ACCESSORY		
LONG RANGE WIRELESS get ready in seconds without having to worry about the wires getting in the way. No more getting tangled with your seatbelt. Work, safer, smarter and more comfortable in demanding environments.

	EP7 sonic defender, use with RLN4941	**RLN6511** **RLN6512** **RLN6513**

† HazLoc Details: For more information on which accessories are approved by Underwriters' Laboratory (UL) with certain APX models, please consult the manual provided with each UL-approved APX portable.

IMPRES audio accessories

Mission critical voice transmissions have to be heard over engine, siren, road and wind noise. Fortunately, Motorola's exclusive IMPRES audio accessories are designed to optimize its output based on the accessory in use. IMPRES Visor Microphones are able to pick up and transmit the user's voice consistently to the receiving user regardless of how close they are speaking into the microphone.

APX mobile radio accessories

COMPATIBILITY	ACCESSORY		FEATURES	
MICROPHONES Access critical features directly on the Keypad microphone. Navigational buttons and a full keypad allow users to navigate radio menus, dial phone numbers and send text messages. Three programmable buttons are available for additional customization.

APX mobile radio accessories

COMPATIBILITY	ACCESSORY
INSTALLATION AND MOUNTING ACCESSORIES Mount your radio in your vehicle without compromising safety. Trunnion kits give you the flexibility to mount the radio under your dash, in your dash, between the seats or on the floor. Remote mount kits allow the radio to be mounted in the trunk when dash space is limited.

Antennas

For optimum range and quality, it is important to match the mobile radio's frequency with the proper Motorola antenna. These are available as standard 1/4 wave models or can include 3dB, 3.5dB or 5dB signal gain.

Glossary

Hazloc-capable

For more information on which accessories are approved by Underwriters' Laboratory (UL) with certain APX models, please consult the manual provided with each UL-approved APX portable.

Motorola-approved accessories are a critical part of the overall radio system intrinsic safety certification. Non-Motorola approved accessories may not be certified for APX and if used, could result in equipment that is NOT approved and unsafe in a hazardous environment.

IP rating

Ingress Protection (IP) is a global standard for rating dust and water protection. The first digit IP5x or IP6x represents increased levels of dust protection. The second digit, IPx7 or IPx8 represents increased levels of water protection.

IPx7 represents withstanding submersion in 1 meter of fresh water for 30 minutes.

IPx8 represents heating accessory to 27°C higher than the water temperature for 2 hours then immediately immersing it to a depth of 1 meter for another 2 hours.

IPx8+Rugged represents exceeding industry specs by heating accessory to 27°C higher than the water temperature for 2 hours then immediately immersing it to a depth of 2 meters for another 4 hours.

Note: Ingress Protection (IP) rating at system level is following the lowest IP rating of all devices connected.

Microphone noise suppression

Multi Mic Noise Suppression: Five integrated microphones and Adaptive Audio Engine automatically change the level of noise suppression, microphone gain, Windporting and speaker equalization to produce clear and loud audio in any environment.

Dual Mic Noise Suppression: Dual-microphone design tracks your voice so that you can keep your eye on what's in front of you while speaking. A digital signal processor (DSP) algorithm helps suppress background noise so you can be heard clearly regardless of the noise around you.

Windporting (Motorola Exclusive): Windporting reduces the effect of wind and other outdoor noises on your microphone performance and prevents water from clogging the microphone and distorting your transmission.

Noise-cancelling microphones negate crowd or machinery noise so your voice comes through loud and clear anytime you speak directly into the microphone.

Swivel or fixed loop

Secure to a belt loop and the case swings freely from side to side. The swivel latch system also allows the radio and case to be removed from the belt loop by simply inverting, lifting it up and out of the belt loop. Fixed loops provide a sturdy attachment to your belt.

Accessory software
